7 Practical CSS Tips

You not only learn more Python by implementing what you already know but, in the end, you can see how all your hard work pays off.

7 Practical CSS Tips

Recently, I've been automating tasks more than often due to my lack of time. Thanks to that I have 5 new projects that I classified as beginner, intermediate, and advanced. You'll find links to the full scripts and tutorials to solve each project. Also, I'm leaving a challenge to each of them to test your Python skills. To make things easier, I already created a template for a cover letter. Here's how the template we'll use looks...
